

Please provide the following information	Do you support the creation of the Saint John Region as an Energy Hub for Atlantic Canada, and would your party's platform support such development?	Transportation infrastructure (ports, airports, highways, etc) are each an integral part of the Energy Hub and business in the Saint John Region. Each currently require maintenance and upgrading. If elected, would you ensure federal funds for transportation infrastructure are received to undertake such maintenance?	Will your party's environmental policy negatively impact the plans for the Energy Hub in the Saint John Region as outlined in the Benefits Blueprint document?	Poverty is a significant problem in Canada. For instance, there are approximately 8,300 children in Saint John living in poverty. Do you believe the Federal government has a financial role in alleviating this problem?	Do you agree the Federal Government should participate, through funding, in the construction of recreational facilities and the development of recreational programs for the youth in our community?

Please provide the following information	What do you see as Southern New Brunswick's top three priorities at this time and what would you do to support them if you are elected? (maximum 75 words)	Workforce issues are increasingly a national concern and require a national initiative. How do you propose to support to address this key priority? (maximum 75 words)	Post-secondary education is a key priority for the development of a workforce. What are you prepared to do to support it if elected? (maximum 75 words)	How would you promote and encourage business activity in Southern New Brunswick? (maximum 75 words)	What do you see as the role of Federal MPs in promoting better access to healthcare and wellness strategies? (maximum 75 words)	What would you do to foster a strong positive working relationship between the three levels of government in Southern New Brunswick if you are elected? (maximum 75 words)
Name:	Open-Ended Response	Open-Ended Response	Open-Ended Response	Open-Ended Response	Open-Ended Response	Open-Ended Response

Michael Moffat	<p>Hemp production, animal welfare initiatives, child and family poverty: Empower people, grassroots issues and Red Flags we need to deal with. Hemp fuel, medicine, foods, sustainable housing, better health stronger minds and richer resources. We must change industry farming as it is cruel and produces sick food, animal testing does little more than take lives and speed meds and chemicals to the streets with many human deaths and sickness.</p>	<p>To change the laws at the federal level not only to get money but to empower the People to become Self sufficient and able to increase education and health care and Nutrition to its people we will have gone a long way towards fixing many of these issues. Create more Farmers as well new Industry and renew old, out of Date ones and Open the path to sustainable Resources in every sector of Saint John. A show case it will act as a Pillar component to the rest of NB and Canada on how to Take back our lives to start living.</p>	<p>We could provide next to free education for 20000 NB students a year with a kick at the end a contract to work in the province for a min of 4 years. This would be provided by hemp Production that would bring 100 million dollars into the Education system and 100 million more to the health Care system and 10s of Millions into the Animal and community Campaigns towards better eating and sustainable living as well a much needed workforce.</p>	<p>Through sustainable production and marketing of new Ideas and products not only for Local use but towards the rest of the country and world market. Incentives to promote investment, promote female entrepreneurship, develop partnerships that promote cleaner, cheaper, smarter business practices. Promote economy and efficiency in Federal procurement and Encourage laws that Empower the people of Saint John to Empower themselves.</p>	<p>Advocating that the federal government take a leadership role in obesity, promoting wellness in the aged person, better access to healthy physical environments for all People, nutrition services and a well funded mental health care system and never to lose sight of the patients Right and the health care providers to play a more active role in the Treatments that make sense.</p>	<p>I would Build Strong relationships with the people of Southern NB to inform them of Ideas and Thinking at all levels of government I would Foster Relationships with Government that are working for the agenda of positive change for the Communities of this area and across the country. My first Loyalty does and always will lie with the people of Saint John and the betterment of this province so we can all be proud of what we have done together. I will do for our community what is right not what makes me Friends in the government.</p>
----------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>Paul Zed</p>	<p>1) investment in infrastructure, 2) development of the Atlantic Gateway and energy hub and 3) a continued emphasis on poverty and affordable housing. I have a \$75 million plan to address our drinking water infrastructure needs. Our 10 year, \$70 billion plan will also address wastewater management, bridges, roads and airports; we have allocated funding for gateways and corridors, and we have a plan to build more affordable housing and win the war on poverty.</p>	<p>We will deal with this issue by working together as a team, and we should convene a taskforce of national, provincial and local representatives to work together to develop new paths to accreditation and employment. Working with the Saint John Board of Trade, Enterprise Saint John, as well as labour and social activists, we can create the conditions that are necessary to meet our workforce challenges.</p>	<p>A new \$1,000 Education Grant for every student, 200,000 needs based bursaries of up to \$3,500 yearly, 100,000 access bursaries of up to \$4,000 yearly, creation of education grant delivered to students 4 times a year, guaranteed eligibility of student loans of \$5,000, regardless of parental income, lower interest rate for all student loans, extension of grace period on repayment to two years, making grace period interest-free, extending time individuals have to repay student loans.</p>	<p>By working together as a team. As a party, we have the lowest business tax rate of any party; we have policies that reward efficiency and innovation, which will help foster business activity in Southern New Brunswick. We will continue to work together to attract investment, to attract people, and to build on our energy hub, so that we can continue and grow and prosper.</p>	<p>We worked hard as a team establish a medical school at UNBSJ. We will introduce a doctors and nurses to help all families in Greater Saint John and we will create a catastrophic drug plan so those living with serious illnesses can focus on their health, instead of worrying about their finances. We need a residential hospice, a methadone clinic, a needle exchange and better services for mental illness.</p>	<p>I will work with anyone who wants to build a better Saint John, Rothesay, Quispamsis, and New Brunswick. I check my partisanship at the door. I have worked with 3 Prime Ministers, 4 Premiers and dozens of mayors and councils. Team Saint John and has allowed us to be successful on Harbour Cleanup, the development of the energy hub, affordable and seniors housing, and maintaining our region's share of federal jobs and money.</p>
-----------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>-Allocate one cent from GST on an approximate per capita basis to municipal governments for "Green Cities" initiatives such projects as upgrades to water treatment, sewage treatment, affordable transit infrastructure, etc. -Will not allow new nuclear plants and not allow a storage nuclear waste site in New Brunswick. - Re-invest in our national rail systems which include the return of passenger rail for</p> <p>Mike Richardson Saint John.</p>	<p>- reduce payroll taxes paid by businesses. -Re-establish a federal minimum wage of \$10 an hour under the Canada Labour Code. -Support changes to the Employment Standards law to provide equal protection to contract and temporary workers. -Strengthen non-union workers' rights and protections to close the widening gap between union and non-union workplaces.</p>	<p>-Increase funding for a needs-based Canadian National Student Loan and Bursary Program with low interest rates. -Forgive 50% of a student's loan when they complete a degree or certificate program. - Increase ear-marked federal transfer payments to provinces for post-secondary education to enable post-secondary institutions, academic and trades, to increase spaces for student enrollment in exchange for tuition fee reductions. -Support expanding industry-based job training and apprenticeship programs to address shortages of trained workers.</p>	<p>-Establish a federally funded Small Cities Green Venture Capital Fund to support viable local green business start-ups. -Set up a Green Venture Capital Funding Program providing matching federal funds for locally raised venture capital up to a set limit per community. -Reduce the paperwork burden on small businesses by eliminating duplicative tax filings and red tape. Government agencies will share information from the same database.</p>	<p>-Provide funds immediately to begin training more doctors and nurses. -Reduce drug costs with a Universal PharmaCare program, a bulk drug purchasing agency, and make new drug patent protection times shorter. -Set Provide student loan forgiveness incentives for graduating doctors, nurses, paramedics and other health care professionals who agree to staff rural facilities and family practice clinics where recruitment is currently a problem. -ensure our public health insurance plan is managed in a public, not-for-profit fashion.</p>	<p>-encourage more dialogue and participate in joint projects between all three levels of government. We will set goals that put people and the environment first. -The Green Party approach to governing is to think holistically with the key question "How can we achieve the best possible economic result?". It would require a great deal of federal, provincial and municipal co-operation, consultation and negotiation.</p>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>In the last several weeks it has become increasingly apparent we must make economic decisions that ensure continued economic growth and maintaining our social programs. We must focus on bringing in new business to Saint John and assisting small business owners. We must controlling our economy and financial markets to maintain value in the taxpayer pension plans. There must be attention paid to developing water treatment plants on both sides Saint John that will meet new federal guidelines. Keeping in mind that Saint John also provides water service to citizens of suburban areas of the region.</p> <p>Tony Mowery</p>	<p>A portion of my current employment has been human resources and recruiting for a small local business. There are two challenges; training skilled labour and recruiting people interested in earning a living in the service industries. The New Democrats are proposing a federal minimum wage of \$10 per hour. People in service industries such as senior and child care take care of our most vulnerable citizens and often do not earn a wage that enables them to support their own families without working overtime. We must increase funding to trades and post secondary education. The New Democrates have promised an additional \$1000.00 bursary for all these students. EI will be extended to employed people wishing to take leaves to enhance their education and expand the skills needed to obtain more lucrative job opportunities. Also we should have a forgivable portion of their loan when these students stay and work in our region.</p>	<p>The New Democratic platform promises an additional \$1000.00 bursary for these students immediately. Moving forward the New Democrats have promised 50 Million dollars per year for the next four years to reform the student loan programs, expand interest relief while student gain work experience upon completing their studies. Reforms to EI will waive waiting periods for tradespeople undertaking apprenticeship programs. As a graduate of UNBSJ I believe we must keep our university in Saint John. The New Democrats promise to provide more funding to post secondary institutions to control rising tuitions fees.</p>	<p>The team approach must be continued in Saint John. I will cooperation with the Mayor and Council, city management, local MLA's and the skilled private organizations to attract new businesses. We must also assist local manufacturing companies, the port and transportation companies that are trying to stay competitive giving the current global financial market. We are becoming the region's energy hub and we have opportunities expand this hub into also generating "Green" energy from renewable resources such as wind and solar. These projects would also generate work for skilled tradespeople during construction and continued work for highly trained people to monitor and maintain these facilities.</p>	<p>I can personally attest to the responsibility and burdens encountered by families taking care of aging family members. People should not have to risk losing their homes to pay for additional home care or medicines. Getting older is a condition we all will experience it is not a disease. The New Democratic platform promises more funding for home care to relieve the burden on families and the hospital system. People suffering from Diabetes, Parkinson's, Alzheimer's, MS and various other diseases and cancers will enjoy a better quality of life if they are able to stay in their own homes. The New Democrats have promised increased funding for more Canadian medical schools. Portions of student loans for doctors and nurses will be forgiven if they work in regions with shortages of these professionals.</p>	<p>I will work with all three levels of governments to ensure we work together to improve our economic situation. All three levels of government must work together to improve roads, water treatment and ensure affordable housing. We must all place a priority on reducing poverty, drug addiction and crime. Since I am not a career Politian I don't believe in partisan politics. I believe in not wasting our money we must work together to build our city.</p>
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>Mark Wright</p>	<p>Our economy, doctor recruitment and retention, and post secondary education. Once elected I would work hard at making it much easier to access post secondary education, so that hopefully we would also be able to alleviate certain other issues such as doctor recruitment and in the end it all works to aid our economy. The three work together and for someone to say that our economy is great, is really out of step with reality.</p>	<p>A lagging workforce is something that indeed creates a multitude of issues. If you don't have enough workers than the workers that you do have, are required to take on a higher workload and increase the chance of burnout. In order to alleviate this, we need to work in getting a stronger workforce. The direction we are heading of losing over 90,000 private sector jobs in the last month or so is not helping.</p>	<p>In order to really alleviate the first two in issues we need to make access to post secondary education easy for everyone. That is why when a Liberal government is elected we will put in place a guaranteed \$5,000 student loan regardless of parental income. This will be available for anyone, studying anything. As well we will increase the pay back time from 6 months no interest to 2 years no interest. Therefore students are able to focus on getting a job in the area of their study and set up before paying back their loans.</p>	<p>I would take every opportunity when talking to developers that are looking for places to set up, to let them the wonderful area that is my province, New Brunswick. I would point out the friendly people and the support they would receive even from Municipal Councils. I would also let them know that if they are setting up with Green technology in mind that a Liberal Government would aid them financially in that endeavour.</p>	<p>I believe that Federal MPs should take every opportunity in promoting better access to healthcare. That is why as Liberal Government we are putting our money where our mouth is so to speak. We understand the need to alleviate wait times, is solved by recruiting more doctors. Therefore if a doctor is prepared to set up in an area that is struggling with doctors, we will wipe up to \$10,000 per year off of their student loan.</p>	<p>I currently serve on municipal government in Sussex. I understand the need to work collectively. Regionalization is a word I hear a lot, but it has to go well beyond just surrounding communities, it has to go to the Provincial and Federal levels. At the end of the day, we are all working together for the betterment of Canada</p>
<p>Nancy MacIntosh</p>	<p>Change the brand to include all of Southern NB, recruit, entice, invest in alternative energy, have coordinated tourism strategy, get infrastructure ASAP to showcase Southern NB as Open for Business</p>	<p>Work with province to identify workforce needs, work with Multicultural Association, target those people we need in Canada and NB, revamp Immigration priorities and laws.</p>	<p>Liberal platform has many initiatives that will help university students. We need to invest in trades, offer rebates for students remaining in NB, offer scholarships and bursaries, have Centres of Excellence</p>	<p>My focus is on encouraging business in NBSW - energy, eco-tourism and economy as Gateway to Atlantica. I will cold-call, court companies - sell NB</p>	<p>Liberal platform addresses many immediate needs. Medicare is part of transfer payments, but feds can contribute through dedicated programs and wellness investments. (Sports, music, arts - all contribute to well-being)</p>	<p>I believe in consultation and consensus. Being sensitive to municipal and provincial priorities and negotiating compromises so priorities are met and everyone is satisfied. We are all in it to help our communities, so achieving our goals is a basic assumption upon which to build agreement</p>

three priorities are:

The Economy, Energy and the Environment

Clearly, the economy is the major issue in our region and across the country. We have a unique opportunity in southern New Brunswick because of our proximity to the largest market in the world and our emerging potential as an energy hub. But we also need to protect our environment for future generations. Combined properly, these realities could represent tens of thousands of jobs and enormous, sustainable opportunities for our region.

Our recent announcement to twin the remainder of Route 1 will serve as a key to any Atlantic Gateway strategy. So will the completion of the third international bridge in St. Stephen. We must be able to move our goods and services quickly and

Our greatest resource is our people, and you are correct in noting that this is a national issue. Our government also recognizes this and we are taking action. We've signed Labour Market Agreements with each province to improve skill levels and increase workforce participation.

We've also increased federal transfers for post-secondary education, created tax credits for apprentices, and developed incentives for employers to increase productivity. At the same time, we are creating and supporting the kind of challenging, high-paying jobs that will allow us to keep more of our young people here: whether its modernizing the St. Andrews Biological Station or supporting expansion in the energy sector.

But the labour shortage will also require us to look beyond our borders. That's why we've streamlined our immigration system and are moving ahead with efforts for recognizing foreign credentials. These measures all come together under our Advantage Canada strategy with its clear goal: To create the best-educated, the most skilled and the most flexible workforce in the world.

it clear to small businesses and large companies that we support innovation and excellence. By reducing taxes and eliminating unnecessary red tape, we are creating a business climate in southern New Brunswick (and the rest of Canada) that allows our entrepreneurs to be

successful and attracts foreign investment. At the same time, we are investing in the local infrastructure we need to support economic development and growth. This includes everything from modern highways and border crossings to improved municipal services. It also means enhancing the so-called "soft" services which make our region's quality of life such an attractive place to locate businesses and raise families. Through ACOA, we are also promoting Atlantic Canada in foreign markets more than

Canadians need to have access to high quality health care, whether they live in Calgary or Campobello. We immediately put an extra \$47 million into the Canada Health Transfer for New Brunswick over our first two years in office. And we are supporting a variety of projects and best practices aimed at reducing health care wait times. We've improved product labelling, so Canadians can make informed choices about the products they buy. Healthy lifestyles are key to healthy outcomes, and we have introduced the Fitness Tax Credit, to help families enroll their children in sporting activities.

As I often say, we know that every day New Brunswickers of all political stripes are working shoulder to shoulder to build a better life for themselves and their families. They believe in their communities and they want a stronger tomorrow for New Brunswick. And what's more, they expect the same from their politicians. They expect us to work together for a common good – not personal advantage or political points. And our government's first term in office has shown we understand. As Regional Minister for New Brunswick, I'm proud of the strong working relationship I have with Premier Shawn Graham and his government, and the equally successful approach we've taken to working with municipalities – from our largest cities to our smallest villages. That will only continue to grow after Oct. 14

Greg Thompson

<p>Rodney Weston</p>	<p>priorities are : The Economy, the Economy and the Economy. Clearly, the economy is the major issue in our region and across the country. We have a unique opportunity in southern New Brunswick because of our proximity to the largest market in the world and our emerging potential as an energy hub. But we also need to ensure that our environment is maintained for future generations. Combined properly, these realities could represent tens of thousands of jobs and enormous, sustainable opportunities for our region. Our recent announcement to twin the remainder of Route 1 will serve as a key to any Atlantic Gateway strategy and more has to be done especially with respect to the Port of Saint John. We must be able to move our goods and services quickly and</p>	<p>Our greatest resource is our people, and you are correct in noting that this is a national issue. Our government also recognizes this and we are taking ACTION. We've signed Labour Market Agreements with each province to improve skill levels and increase workforce participation. We've also increased federal transfers for post-secondary education, created tax credits for apprentices, and developed incentives for employers to increase productivity. Including the provision of support to apprentices that complete their programs. At the same time, we are creating and supporting the kind of challenging, high-paying jobs that will allow us to keep more of our young people here: whether its modernizing the St. Andrews Biological Station or supporting expansion in the energy sector. But the labour shortage will also require us to look beyond our borders. That's why we've streamlined our immigration system and are moving ahead with efforts for recognizing foreign credentials,</p>	<p>Our government has made post-secondary education a priority from the start. In our first budget we put an extra \$37 million over two years in the Canada Social Transfer to support post-secondary education in New Brunswick. This year, we've announced more improvements to support Canadians who want to pursue a post-secondary education. This includes more federal transfers, a modernizing of the Canada Student Loans Programs, and making the rules for RESPs more flexible. The Conservative government is spending wisely to ensure students are part of the future and not simply paying for the present.</p>	<p>it clear to small businesses and large companies that we support innovation and excellence.
